

Grade 7 Accelerated
Unit 1
Lesson 9 Homework

Name _____
Date _____
Period _____

For questions 1-4, use the inequality $-30 \geq -6(8 - x)$.

1. Solve $-30 \geq -6(8 - x)$ by using the distributive property first.

2. Solve $-30 \geq -6(8 - x)$ by eliminating the -6 first.

3. Graph the solution to the inequality.

4. Use substitution to verify the solution set.

5. Which of the following represents the solution to the inequality below?

$$-(a + 4) > -7$$

For questions 6-9, solve each inequality and graph the solution set using whichever method you prefer.

6. $9 > 3(5c - 7)$

7. $\frac{1}{3}(6 - m) \geq -4$

8. $-0.9(x + 2.5) < -2.25$

9. $\frac{5}{3}\left(11 - \frac{x}{8}\right) \geq 20$

10. Your friend was absent from class today. Describe how to solve the inequality $2(-7 + d) \leq -16$ in two ways.
