

Grade 6 Accelerated
Unit 15
Lesson 1 Homework

Name Answer Key
Date _____
Period _____

For questions 1-4 use the word “**MATHEMATICS**.”

1. What are the possible outcomes of choosing a letter randomly?
M, A, T, H, E, I, C, S
2. Which outcomes have more than one possibility?
M, A, T
3. How many outcomes are included in the event that a consonant is chosen?
5 – M, T, H, C, S
4. How many outcomes are included in the event that a vowel is chosen?
3 – A, E, I

5. The list of all possible outcomes for an experiment is called the

- ☐ event.
- ☒ **sample space.**
- ☐ set.
- ☐ probability.

For questions 6-8, use the standard six-sided dice shown.

6. What is the sample space?
1, 2, 3, 4, 5, 6

Mike and Meeka are playing a game with the six-sided dice. For each game, determine and explain whether it is fair or not.

7. Mike wins if an odd number is rolled. Meeka wins if an even number is rolled.

This game is ☒ **fair**
☐ unfair because both outcomes have an equal chance of occurring.

8. Mike wins if a number 4 or less is rolled. Meeka wins if a number 5 or greater is rolled. This game is ☐ fair ☒ unfair because Mike's outcome has a higher chance of occurring.

Use the two spinners shown below for questions 9-10.

9. How many outcomes does each spinner have?
6

10. One of the spinners is fair and the other is unfair.

Spinner 1 is ☐ fair ☒ unfair because each section does not have an equal chance of being selected.

Spinner 2 is ☒ fair ☐ unfair because each section has an equal chance of being selected.
