

Grade 6 Accelerated
Unit 15
Lesson 2 Practice

Name _____
Date _____
Period _____

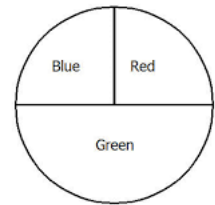

Simple Experiment	Game	Sample Space
Rolling a fair 6 sided number cube 	Player rolls a standard number cube and wins if it lands on a factor of 6.	
Spinning the spinner 	Player spins the spinner and wins if it lands on white.	

1. What are the possible outcomes in the event of rolling a factor of 6 for Game 1?
2. What fraction of the possible outcomes from Game 1 results in a win?
3. What are the possible outcomes in the event of spinning a white?
4. What fraction of the possible outcomes from Game 2 results in a win?
5. Which game does a player have a greater likelihood of winning?

For each simple experiment, determine the sample space.

6. Spinning the spinner

Sample Space

7. Prime numbers between 1 and 100

Sample Space

8. Drawing an ace from a standard deck of 52 cards

Sample Space

9. Select a letter at random from the alphabet

Sample Space

10. Selecting a random day of the week
