

MTR 2.1 — Demonstrate understanding by representing problems in multiple ways.

STUDENTS WHO MASTER THIS STANDARD...

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

TEACHER MOVES (FLDOE CLARIFICATIONS)

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

QUESTION STEMS TO USE TOMORROW

- *“Can you show this another way — a table, a graph, a picture?”*
- *“How does your drawing connect to your equation?”*
- *“Which representation is most useful here? Why?”*
