

MTR 5.1 — Use patterns and structure to help understand and connect mathematical concepts.

STUDENTS WHO MASTER THIS STANDARD...

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

TEACHER MOVES (FLDOE CLARIFICATIONS)

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

QUESTION STEMS TO USE TOMORROW

- *"What does this remind you of? What's similar to problems we've done?"*
- *"Can you break this into smaller parts?"*
- *"What pattern do you notice? Will it always work?"*
