

MTR 7.1 — Apply mathematics to real-world contexts.

STUDENTS WHO MASTER THIS STANDARD...

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate.
- Redesign models and methods to improve accuracy or efficiency.

TEACHER MOVES (FLDOE CLARIFICATIONS)

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

QUESTION STEMS TO USE TOMORROW

- *“Where would you see this math outside of school?”*
- *“Does your model match the real situation?”*
- *“How could you improve your model or method?”*
