

Grade 7
Unit 1
Lesson 1 Practice

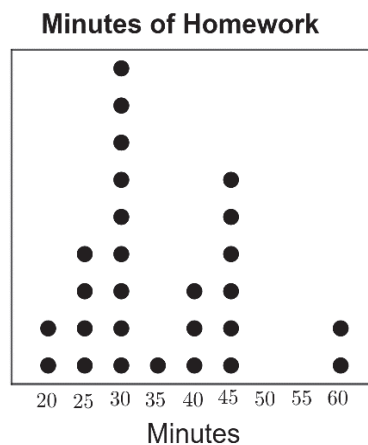

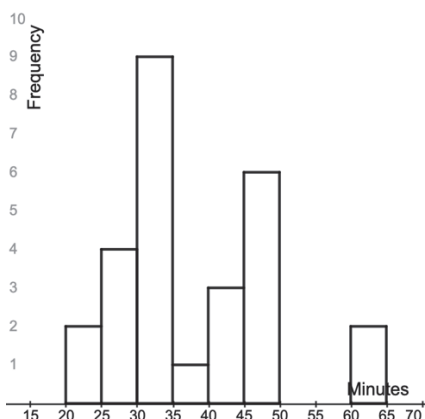

Name _____
Date _____
Period _____

For questions 1-4, identify whether each question is statistical or not statistical. If it is not, rewrite the question so that it can be statistical.

1. How many days are in January?
2. What percent of students at school take the bus?
3. How old is your cat?
4. What is the most popular favorite flavor of ice cream amongst 7th graders?
5. What color buttons are in the jar?

For questions 6-10, use the scenario.

Teachers at Sanford Middle School were collecting data to determine approximately how much homework 7th graders received daily. They made a histogram and a line plot using the data they collected from surveying a sample of students.

6. Which graph can be used to determine how many students were surveyed?
7. How many students were surveyed?
8. What percentage of students reported spending 35 minutes or less on homework every night? Round to the nearest tenth.
9. What is the range of minutes spent on homework?
10. Are there any outliers? If so, name them.
