

Grade 7
Unit 1
Lesson 5 Practice

Name _____
Date _____
Period _____

1. In order to solve the equation $-12 = x + 7$, the equation is _____.

- ☐ add 7.
- ☐ subtract 7.
- ☐ multiply by 7.
- ☐ divide by 7.

The solution to

2. In order to solve the equation $\frac{y}{-3} = -5$, the equation is _____.

- ☐ add -3 .
- ☐ subtract -3 .
- ☐ multiply by -3 .
- ☐ divide by -3 .

The solution to the

3. In order to solve the equation $-55 = 11b$, the equation is _____.

- ☐ add 11.
- ☐ subtract 11.
- ☐ multiply by 11.
- ☐ divide -by 11.

The solution to

4. In order to solve the equation $a - 17 = -9$, the equation is _____.

- ☐ add 17.
- ☐ subtract 17.
- ☐ multiply by 17.
- ☐ divide by 17.

The solution to

For questions 5 - 10, solve each equation using inverse operations.

5. $-2c = -18$ _____

6. $6 = -10 + c$ _____

7. $c - 8 = -23$ _____

8. $6 = \frac{c}{-7}$ _____

9. $7 = c + (-3)$ _____

10. $6y = -54$ _____
