

Grade 7
Unit 11
Lesson 1 Practice

Name _____
Date _____
Period _____

1. Austin works for a law firm and bills customers by the hour, below is a table of various customers he has worked with. How much money (in dollars) does Austin make per hour?

Time (hours)	Money earned (\$)
0.33	49.5
1.75	262.50
6.5	975
9	1,350

2. Using the table above, if Austin works on average 37 hours per week, what is his weekly income?

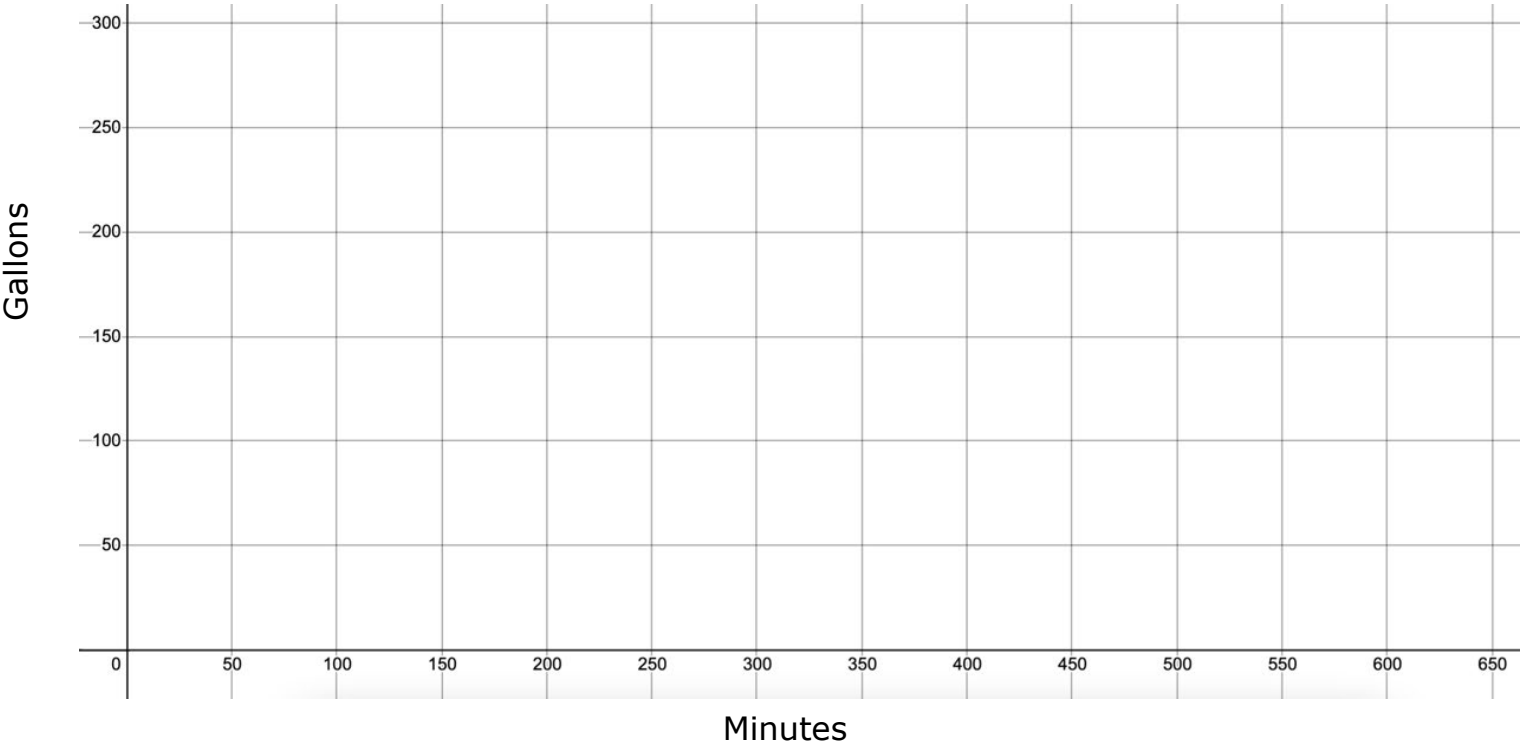

3. Does the following table show a proportional relationship between the weight of blue crab and price?

Weight (lb.)	Price (\$)
4.25	23.80
1.87	11.03
6.4	35.84

4. A hot tub is drained at a rate of 12 gallons every 30 minutes. If a standard hot tub holds 300 gallons of water, how long will it take to drain the hot tub?
5. Using the information in question 4, complete the table below.

Time (in minutes)	Gallons Drained
	1
30	12
	42
	264
	112

6. Graph the proportional relationship below.

7. Looking at the graph, what are key indicators that the relationship between x and y values are proportional?
