

1. A local taco stand charges the same price for tacos, \$2.50 each. A sales rep orders, x , tacos for an office they were visiting. Which equation could be used to find the total price, y , the taco stand charges the sales rep?
- A. $x = 2.5y$
B. $y = \frac{2.5}{x}$
C. $y = 2.5x$
D. $y = \frac{x}{2.5}$

The graph below shows a proportional relationship between the total cost, y , and the amount of golf balls, x , purchased.

2. Is this relationship proportional?
3. What is the constant of proportionality?
4. Using the relationship in the graph above, complete the following table.

Cost (\$)	180			500
Golf Balls		150	215	

5. A line passing through which of the following ordered pairs represents a proportional relationship?
- A. (2,4) and (5,9)
 - B. (3,6) and (4,7)
 - C. (2.5,5) and (8,16)
 - D. (1,3) and (3,6)
6. In the state of Arizona, there is a 8% income tax. Complete the table of values that represents the income earned, x , and the amount of taxes paid, y .

Income Earned (x)	Income Tax (y)
450.00	
720.00	
1600.00	
3500.00	
4250.00	
5000.00
