

Grade 7
Unit 12
Lesson 1 Practice

Name _____
Date _____
Period _____

1. The tin can has a diameter of 5 inches (in.) and a height of 4.5 in. Draw the net of the tin can including the dimensions.

Use the right circular cylinder below for questions 2 – 6. Represent your answers as an approximation by using 3.14 for π .

2. Draw a net for the right cylinder including the dimensions.
3. What is the area of one of the circular bases? Include units.
4. What is the circumference of one of the circular bases? Include units.
5. What is the area of the rectangle? Include units.
6. What is the surface area of the right cylinder?

Complete the following for the given context. Represent your answers as an approximation by using $\frac{22}{7}$ for π .

7. Draw a net for the right cylinder including the dimensions.

8. What is the surface area of the right cylinder?

The net of a right circular cylinder is shown for question 9 – 10.

9. The length of the rectangle is equal to the

- ☐ radius
- ☐ diameter
- ☐ area
- ☐ circumference

of the circle.

10. Find the surface area of the right circular cylinder. Use 3.14 for π and include units.
