Period _____

Some wooden chests are in a store. A green chest has a length of 165 centimeters (cm), a width of 70 cm, and a height of 10 cm.

1. If another box, a blue box, is proportional in size, what is its length if its width is 18 cm?
2. If another box, a red box, is proportional in size, what is its height if its length is 14 cm?
3. A blue marble can make 8.45 laps around a track in 22.15 seconds (s). Meanwhile, a yellow marble makes 7.50 laps around a track every 15 s. What is the unit rate for the marble that circles the track faster?

For questions 4-10, use the following scenario:

For a family dinner, AnnaMarie is making a turkey casserole. The recipe serves 8 and calls for the following:

1 pounds (lb) egg noodles

2 cloves garlic

$\frac{1}{4}$ cup (c) all-purpose flour

1 c heavy cream

1 c frozen peas

6 tablespoons (tbsp) butter

1 lb cremini mushrooms

$2\frac{1}{2}$ c low-sodium chicken broth

2 lbs leftover turkey

If AnnaMarie adjusts the recipe to serve 6 people, determine how much of each of the following she will need.

1 pound (lb) = 16 ounces (oz)
1 cup (c) = 16 tablespoons (tbsp)

4. _____ lbs of egg noodles.

5. _____ tbsp butter

6. _____ tbsp of all-purpose flour

7. _____ oz turkey

8. _____ oz cremini mushrooms

9. _____ c frozen peas

10. _____ c low-sodium chicken broth
