

Grade 7
Unit 7
Lesson 1 Practice

Name _____
Date _____
Period _____

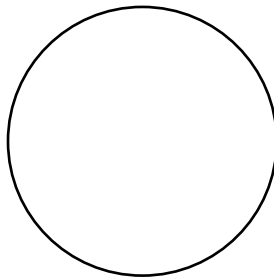

1. Divide the circles into *fourths* and *fifths*.

2. Complete the table with the fraction and percentage of the whole circle that each congruent sector represents.

Sector	Fraction	Percentage
Thirds		
Sixths		
Eighths		

Use the circle to answer questions 3-5.

3. How can the circle be divided into *one half* and *three sixths*?
4. What is the sum of all the fractions in the circle?
5. What is the sum of all the percentages in the circle?

For each circle division write the central angle measure and the ratio of angle measure to 360° .

6. Circle Division: *Halves*

Central Angle Measure: _____ Ratio of angle: _____

7. Circle Division: *Fourths*

Central Angle Measure: _____ Ratio of angle: _____

8. Circle Division: *Sevenths*

Central Angle Measure: _____ Ratio of angle: _____

9. Circle Division: *Eighths*

Central Angle Measure: _____ Ratio of angle: _____

10. Circle Division: *Ninths*

Central Angle Measure: _____ Ratio of angle: _____
