

Grade 7
Unit 1
Lesson 4 Practice

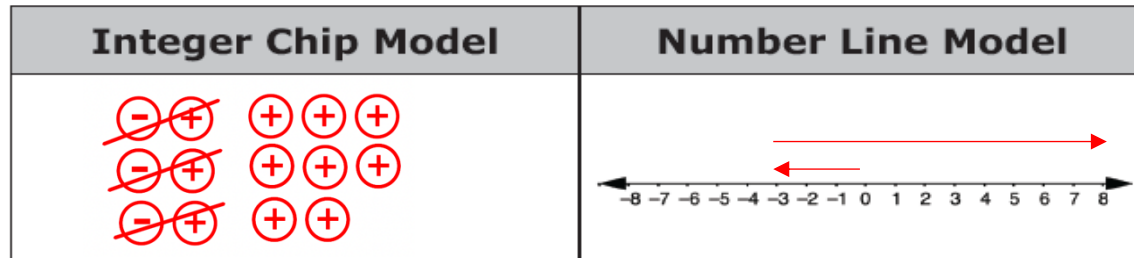

Name Answer Key
Date _____
Period _____

Model each addition or subtraction using the integer chip model and the number line model.

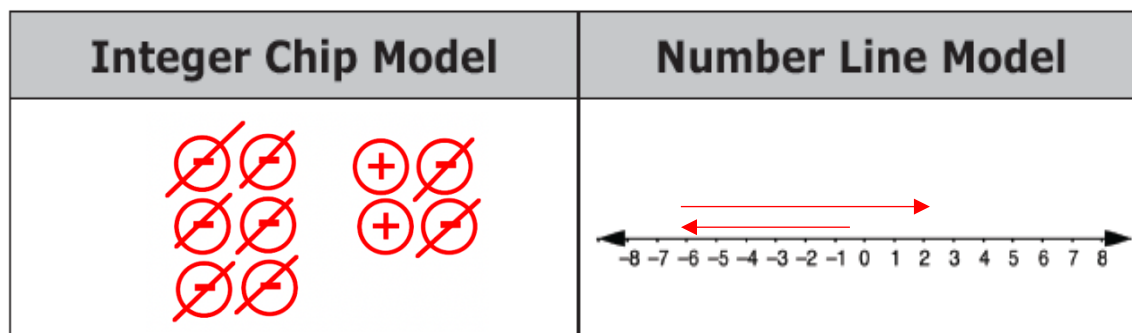

1. $-4 - 3 = \underline{-7}$

2. $-3 + 11 = \underline{8}$

3. $-6 - (-8) = \underline{2}$

4. When multiplying or dividing integers with the **same** sign, the sign of product or quotient will be

- ☐ positive
☐ negative

5. When multiplying or dividing integers with **opposite** signs, the sign of product or quotient will be

- ☐ positive
☐ negative

Evaluate each expression.

6. $-156 + (-97) = -253$

$$\begin{array}{r} 156 \\ + 97 \\ \hline 253 \end{array}$$

7. $63 \div (-9) = -7$

Opposite signs = -

8. $-8 \cdot (-7) = 56$

Same signs = +

9. $-34 - (-17)$

$$-34 + 17$$

Find the difference, keep the sign of larger absolute value

$$\begin{array}{r} 34 \\ -17 \\ \hline 17 \end{array}$$

10. $-6 \times 5 = -30$

Different signs = -
