

Grade 7
Unit 13
Lesson 8 Practice

Name Answer Key
Date _____
Period _____

Cooper and Turner were training to run a marathon. They recorded the number of miles they ran for the 30 days leading up to their marathon. Their miles ran are recorded below.

3	2	11	13	2	7	8	1	0	4
9	5	6	4	8	9	11	13	3	12
14	1	8	7	5	4	5	6	2	0

1. Create an appropriate graphical display of the data.

2. Explain your reasoning for choosing that display type.

Answers will vary. I chose a histogram so I can see the shape made by the set of data.

3. If you were asked to create an additional display type, which would you choose? Explain your reasoning.

Answers may vary. I would choose a box-and-whisker plot to see the five-number summary.

4. Create a second graphical display of the data using your choice in question 3.

Max and Jase planned to drive from Jacksonville, Florida to Boise, Idaho. The recorded the miles they drove from each day they traveled.

{514, 113, 47, 444, 509, 397, 250, 364}

5. Create an appropriate graphical representation of the data.

6. Explain your reasoning for choosing that display type.

Answers may vary. To get a clearer picture of what the IQR is for this set of data.

7. If the value 47 was removed from the data, which graphical representation would you use to create the data?

Stem-and-Leaf Plot

8. Create an appropriate graphical representation of the data without the 47.

Miles Driven

Stem	Leaf
1	13
2	50
3	64, 97
4	44
5	09, 14

Key:
1|13 = 113

9. If you were asked to create an additional display type, which would you choose? Explain your reasoning.

A histogram so I can see the shape of the set of data

10. Which is your *least* favorite type of graphical representation to create when displaying numerical data? Explain.

Answers will vary. A box-and-whisker plot because it takes time to complete.
