

Grade 7
Unit 6
Lesson 2 Practice

Name _____
Date _____
Period _____

The exchange rates from Mathlandia are shown.

Exchange Rate		Unit
1 equi ≈	1.32	sal(s)
	0.85	pop(s)
	15.90	peak(s)
	0.30	var(s)
	7.75	ops(s)

For questions 1-4, determine the equivalent values for each currency exchange. Round to the nearest hundredth.

1. 47 equis = 62.04 sals
 $47(1.32)$

2. 286.67 equis = 86 vars
 $\frac{86}{0.30}$

3. 24 peaks = 1.51 equis
 $\frac{24}{15.90}$

4. 30 equis = 25.5 pops
 $30(0.85)$

Andrea exchanged \$500 for 442 euros. Complete the two statements based on this currency exchange. Round to the nearest hundredth.

5. 1 dollar = 0.88 euro(s)
 $\frac{442 \text{ euros}}{500 \text{ dollars}} = \frac{x}{1 \text{ dollar}}$

6. 1 euro = 1.13 dollar(s)
 $\frac{442 \text{ euros}}{500 \text{ dollars}} = \frac{1 \text{ euro}}{x}$

Kylie exchanged 900 US dollars for 103448.28 Japanese yen. Complete the two statements based on this currency exchange. Round to the nearest hundredth.

$$7. \quad 1 \text{ dollar} = \frac{103,448.28}{900} \text{ yen} = \underline{114.94} \text{ yen}$$

$$8. \quad 1 \text{ yen} = \frac{900}{103,448.28} \text{ dollar(s)} = \underline{0.01} \text{ dollar(s)}$$

After arriving in Australia, Jason exchanged \$750 of US currency for \$1,041.67 Australian dollars. Complete the two statements based on this currency exchange. Round to the nearest hundredth.

9. What is the exchange rate of US dollars per Australian dollar?

$$\frac{\text{US } \$750}{\text{AUS } 1041.67} = \frac{x}{\$1} \quad \frac{750}{1041.67} \approx 0.72$$

10. What is the exchange rate of Australian dollars per US dollar?

$$\frac{\text{US } \$750}{\text{AUS } 1041.67} = \frac{\$1}{x} \quad \frac{1041.67}{750} \approx 1.39$$
