

The circle graph reflects the results of a survey of the most purchased vegetables in a store.

1. What vegetable do most people purchase?
Lettuce
2. What vegetable is the least purchased?
Broccoli
3. What vegetable do about $\frac{1}{2}$ of the customers purchase?
Lettuce
4. What vegetables, when combined, do about $\frac{1}{4}$ of the customers purchase?
Onion and broccoli

Ruth made a survey for her school to find out students' favorite movie type. She made a circle graph from the 400 total students surveyed.

5. What is the most favorite movie type among students?
Animated
6. What is the least favorite movie type among students?
Horror
7. What *two* movie types, when combined, are about $\frac{1}{4}$ of the students' favorite movie types?
Science Fiction and Action (or Horror)
8. How many students like horror movies?
 $400 \times 0.1 = 40$ students
9. How many students preferred science fiction movies?
 $400 \times 0.12 = 48$ students
10. How many students like comedy?
 $400 \times 0.28 = 112$ students
