

7th Grade Unit 1 Assessment Guide

General Information	This assessment can be used by the teacher as a short diagnostic to determine whether a student recalls some the prerequisite benchmarks from grade 6 or it can be used after a class completes unit 1. The teacher is encouraged to remember that the questions on this assessment cannot give a complete picture, but they can serve as general information. Just because a student misses a question on this assessment does not mean that the student has a learning gap. Teachers should look at their students as a collective to determine if there are any noticeable gaps that may take some remediation. Often remediation is best done within the grade-level learning as students continue to learn new content. Students may need support just prior or during the grade-level learning. Halting all grade-level learning to reteach content from earlier grades may not be the best form of remediation. National Council of Teachers of Mathematics' Equity and Access statement includes the phrase "all students routinely have opportunities to experience high-quality mathematics instruction, learn challenging mathematics content, and receive the support necessary to be successful." This introductory unit and assessment can be used as a tool to help students receive support while continuing their learning of challenging mathematics content. If this assessment is used as a diagnostic, then the content from unit 1 may be a tool for the teacher to use to supplement student learning to help remediate. Teachers may also use instructional tasks from the grade 6 Big M for the prerequisite benchmarks.
Calculator Information	The assessment is no calculator.
Total Recommended Points	The total recommended points in this guide is 100 points.

Question	1	Benchmark(s)	MA.6.DP.1.1
	☐ What is your favorite food? ☐ What states have you visited? ☐ What city is the capital of Florida? ☐ How many languages do you speak fluently? ☐ Which Florida college has a gator as a mascot? ☐ Which Florida county produces the most oranges? ☐ How many times have you been to Walt Disney World?	Recommended Scoring (8 Total Points)	Consider giving students 2 points for each correct answer and deduct a point for each incorrect answer. A student who selects all of the answers should not receive any credit.
Question	2	Benchmark(s)	MA.6.AR.2.3
	☐ $\frac{x}{25} = 275$ ☐ $275 = 25x$ ☐ $275x = 25$ ☐ $\frac{x}{275} = 25$ ☐ $\frac{275}{x} = 25$ ☐ $\frac{275}{25} = x$	Recommended Scoring (6 Total Points)	Consider giving students 2 points for each correct answer and deduct 2 points for each incorrect answer.

Question	3a	Benchmark(s)	MA.6.AR.3.2
Unit Rate 2.5 miles per hour or 0.4 hours per mile		Recommended Scoring (2 Total Points)	Consider giving 1 point for the correct value and 1 point for the units that match the unit rate provided.
		Additional Information	Students can represent the unit rate using either answer. Students may also write their answer using fractions.
Question	3b	Benchmark(s)	MA.6.AR.3.2
Marci hikes 2.5 miles in one hour. OR It takes Marci 0.4 hours (24 minutes) to hike one mile.		Recommended Scoring (2 Total Points)	Consider giving 2 points for a correct interpretation.
		Additional Information	Student interpretation should match the unit rate they provided in 3a.

Question	4	Benchmark(s)	MA.6.DP.1.4
Given that professional basketball players tend to be taller than professional baseball players, histogram represents the heights of professional baseball players. The height of the typical player ranges from 70 to 90 inches.		Recommended Scoring (2 Total Points)	No partial credit should be given. Students should correctly answer all parts of the statement.
Question	5	Benchmark(s)	MA.6.AR.3.1
		Recommended Scoring (4 Total Points)	No partial credit should be given. Students may also represent the ratio with an equivalent such as 15:27.
Question	6	Benchmark(s)	MA.6.AR.3.4
The coupon gives Shanice 25% off of the original price.		Recommended Scoring (5 Total Points)	Consider following student work to determine if a minor mathematical error was made. Consider partial credit for minor errors.

Question	7	Benchmark(s)	MA.6.NSO.4.1
☐ $-12 + (-2)$ ☒ $-12 + 2$ ☐ $-2 + (-12)$ ☐ $2 - (-12)$ ☒ $2 - (12)$ ☐ $12 + (-2)$ ☐ $-2 - (-12)$		Recommended Scoring (6 Total Points)	Consider giving students 3 points for each correct answer and deduct a point for each incorrect answer. A student who selects all of the answers should not receive any credit.
Question	8	Benchmark(s)	MA.6.AR.2.3
$x =$ -18		Recommended Scoring (5 Total Points)	Consider following student work to determine if a minor mathematical error was made. Consider partial credit for minor errors.
Question	9	Benchmark(s)	MA.6.AR.2.2
$b =$ 135		Recommended Scoring (5 Total Points)	Consider following student work to determine if a minor mathematical error was made. Consider partial credit for minor errors.

Question	10	Benchmark(s)	MA.6.AR.2.2
$w =$ -11		Recommended Scoring (5 Total Points)	Consider following student work to determine if a minor mathematical error was made. Consider partial credit for minor errors.
Question	11	Benchmark(s)	MA.6.AR.2.3
$y =$ 144		Recommended Scoring (5 Total Points)	Consider following student work to determine if a minor mathematical error was made. Consider partial credit for minor errors.
Question	12	Benchmark(s)	MA.6.NSO.1.1
Least to Greatest $-\frac{9}{4}, -2\frac{3}{20}, -2.05, \frac{7}{8}, 89\%, 0.9$		Recommended Scoring (6 Total Points)	Consider giving 3 points for the negative numbers in the correct order and 3 points for the positive numbers in the correct order.

Question	13	Benchmark(s)	MA.6.NSO.1.1
The absolute value of point ○ B ○ F ○ H ○ K ○ M ○ W has the same value as ○ C ○ P ○ T ○ Y ○ Z because the ○ distance ○ difference between each point and ○ 0 ○ its opposite is the same.		Recommended Scoring (4 Total Points)	Students should correctly answer all parts to get points. In the first two boxes students can pair with M and P or W and T.
Question	14	Benchmark(s)	MA.6.NSO.4.2
-57		Recommended Scoring (5 Total Points)	Consider giving partial credit if a student makes a minor calculation error. It is not suggested that partial credit be given if the student does not have the correct sign on the answer.

Question	15	Benchmark(s)	MA.6.NSO.4.1
	232	Recommended Scoring (5 Total Points)	Consider giving partial credit if a student makes a minor calculation error. It is not suggested that partial credit be given if the student does not have the correct sign on the answer.
Question	16	Benchmark(s)	MA.6.NSO.4.2
	9	Recommended Scoring (5 Total Points)	Consider giving partial credit if a student makes a minor calculation error. It is not suggested that partial credit be given if the student does not have the correct sign on the answer.

Question	17	Benchmark(s)	MA.6.NSO.4.2
96		Recommended Scoring (5 Total Points)	Consider giving partial credit if a student makes a minor calculation error. It is not suggested that partial credit be given if the student does not have the correct sign on the answer.
Question	18	Benchmark(s)	MA.6.NSO.4.1
-5071		Recommended Scoring (5 Total Points)	Consider giving partial credit if a student makes a minor calculation error. It is not suggested that partial credit be given if the student does not have the correct sign on the answer.
