

Grade 6 Accelerated
Unit 9
Lesson 3 Homework

Name Answer Key
Date _____
Period _____

Jillian took a survey of her class to find out how many sports teams each student joined throughout the last year. Use the data in the table for questions 1–3.

Number of Sports Teams Joined									
0	1	6	2	4	3	0	2	4	2

1. Determine the mean of the data.

$$\frac{24}{10} = 2.4$$

2. Interpret the mean in terms of the context.

In Julian's class, students join an approximate average of 2 sports teams.

3. What is the median number of sports teams students joined?

2

For one week Ruth kept track of how long it took for her in minutes to walk to school. Use the data for questions 4–5.

Day of the week	Total Minutes
Monday	25
Tuesday	22
Wednesday	26
Thursday	18
Friday	20

4. Find the mean.

$$\frac{111}{5} = 22.2 \text{ minutes}$$

5. Circle the data piece that is closest to the mean amount of time she spent walking to school.

6. To calculate the mean, add all the values in the data set and then divide by the total number of data values.

Florida is one of the largest producers of citrus fruits in the United States. The table below shows the amount in millions of citrus fruits produced by season. Use the data for questions 7–8.

Season	Amount of Fruit Produced (in millions)
2001 – 2002	12.824
2002 – 2003	11.206
2003 – 2004	13.045
2004 – 2005	7.597
2005 – 2006	7.832
2006 – 2007	7.236
2007 – 2008	9.119

7. Find the mean of the data.

$$\frac{68.859}{7} = 9.837$$

8. Interpret the mean amount of fruit produced based on the data.

The average yearly amount of citrus fruits was 9.837 million.

9. The Tampa Bay Rays had 6 outfielders in their 2021 season. Find the mean of their ages.

Pitchers Name	Pitchers Age
Randy Arozarena	27
Kevin Kiermaier	31
Josh Lowe	24
Manuel Margot	27
Austin Meadows	26
Brett Phillips	27

10. Circle the data pieces that are closest to the mean.
