Unit 5  
Lesson 5 Homework

Name **Answer Key** \_\_\_\_\_  
Date \_\_\_\_\_  
Period \_\_\_\_\_

Beverly has hired a new employee, Rosa, to help her make cupcakes for the local bakeries. She needs to determine if Rosa makes cupcakes faster, slower, or at the same speed than she does. The table represents the number of cupcakes baked hourly, in dozens.

| Hours | Beverly's Cupcakes by the Dozen | Rosa's Cupcakes by the Dozen |
|-------|---------------------------------|------------------------------|
| 1     | 6                               | 4                            |
| 2     | 12                              | 8                            |
| 3     | 18                              | 12                           |
| 4     | 24                              | 16                           |
| 5     | 30                              | 20                           |

Use the table for questions 1 through 10.

1. According to the table, Beverly bakes one dozen cupcakes at a rate of

☒  $\frac{12}{2}$  .  
☐  $\frac{12}{3}$  .

2. Beverly bakes \_\_\_6\_\_\_ dozen cupcakes in one hour.

3. What is Rosa's rate for 3 hours?

$$\frac{12}{3}$$

4. Rosa's unit rate indicates that she bakes \_\_\_4\_\_\_ dozen cupcakes in \_\_\_1\_\_\_ hour(s).

5. Rosa has a ☒ slower ☐ faster unit rate than Beverly by \_\_\_2\_\_\_ dozen(s).

6. Complete the table using the unit rates that you determined previously.

Beverly was curious as to how her rate of baking cupcakes compared to Rosa's rate throughout the day.

7. The ratio of the number of cupcakes Beverly baked to the number of cupcakes that

Rosa baked after 4 hours is

- ☒ 24 to 16.  
☐ 20 to 20.

8. After an 8-hour day, Beverly baked \_\_\_48\_\_\_ dozen cupcakes and Rosa baked \_\_\_32\_\_\_ dozen cupcakes.

9. How did the unit rate change throughout the day?

It doesn't; it's still the same number of dozens of cupcakes per hour.

10. Give some examples of why Beverly could have been slightly faster, or made slightly more cupcakes, than Rosa.

Answers may vary.

She is more experienced than Rosa; she is more used to the routine, she's able to find ingredients more quickly because it's her kitchen.
