

Triangle K is a **right triangle** within Rectangle N . Use the figure to answer questions 1-3. Each square of the grid is 1 cm by 1 cm.

1. It takes _____ triangles to form Rectangle N .
2. The area of Rectangle N is _____ cm^2 .
3. The area of Triangle K is _____ cm^2 .

The figure shows an **acute triangle**, Triangle F . Rectangle G is drawn around Triangle F .

The figure can be broken into smaller rectangles, Rectangle J and Rectangle K , and 2 right triangles.

Use the figures to answer questions 4-7. Each square of the grid is 1 cm by 1 cm.

4. The area of Rectangle J is _____ cm^2 .
5. The area of Rectangle K is _____ cm^2 .
6. The area of a right triangle is _____ of the area of a rectangle.
7. The total area of Triangle F is _____ cm^2 .

Triangle R is an **obtuse triangle**. Parallelogram Q is formed by duplicating Triangle R and rearranging it.

Use the figures to answer questions 8-10. Each square of the grid is 1 cm by 1 cm.

8. The area of Parallelogram Q is _____ cm^2 .
9. Triangle R represents _____ of the figure of Parallelogram Q .
10. The area of Triangle R is _____ cm^2 .
