

A rectangle is shown.

1. What is the perimeter of the rectangle?

$$2(18) + 2(10) = 56 \text{ units}$$

2. What is the area of the rectangle?

$$10(18) = 180 \text{ units}^2$$

A rectangle is shown.

3. What is the perimeter of the rectangle?

$$2(6.5) + 2(4.9) = 22.8 \text{ units}$$

4. What is the area of the rectangle?

$$4.9(6.5) = 31.85 \text{ units}^2$$

A rectangle is shown.

5. What is the perimeter of the rectangle?

$$2(7) + 2(4) = 22 \text{ units}$$

6. What is the area of the rectangle?

$$4(7) = 28 \text{ units}^2$$

An incomplete rectangle is shown.

7. What are the coordinates of the missing vertex?

$$\left(-9\frac{1}{2}, -3\frac{1}{2} \right)$$

8. How can you confirm the missing coordinate creates a rectangle?

It has the same x -value as point C and the same y -value as point A .

9. What is the perimeter of the rectangle?

$$2(16) + 2(10) = 52 \text{ units}$$

10. What is the area of the rectangle?

$$16(10) = 160 \text{ units}^2$$
