

Grade 6 Accelerated
Unit 3
Lesson 2 Homework

Name Answer Key
Date _____
Period _____

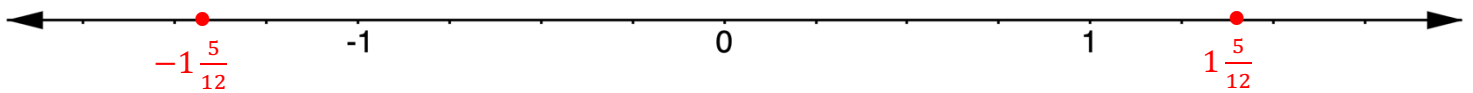

Use the vertical number line to answer the following problems.

1. Plot -4.5 and its opposite.
2. Which is larger, -4.5 or its opposite?

Its opposite of 4.5 is larger.

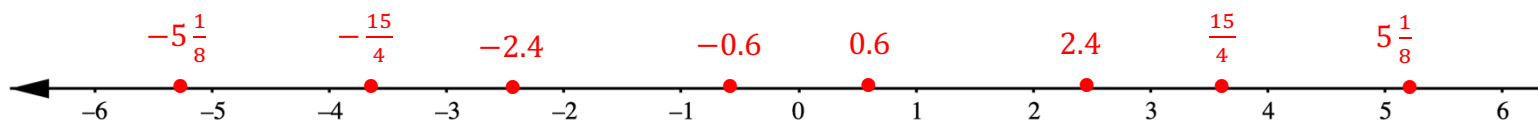

Use the horizontal number line to answer the following problems.

3. Plot $1\frac{5}{12}$ and its opposite.
4. Which is larger, $1\frac{5}{12}$ or its opposite?

$1\frac{5}{12}$ is larger.

5. Plot and label each value and its opposite on the number line: -2.4 , $5\frac{1}{8}$, 0.6 , $-\frac{15}{4}$

Complete each comparison statement for the pairs of numbers you plotted in question 5. Use $<$ or $>$ in the first blank and the given number's opposite in the second blank.

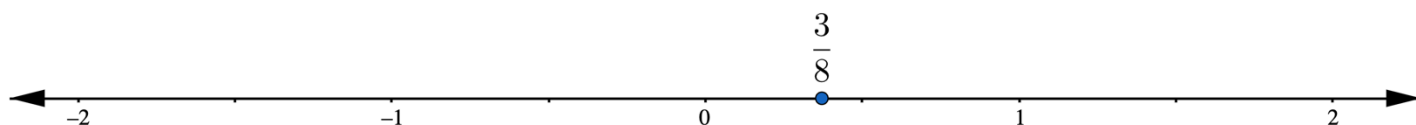

6. $-2.4 < 2.4$

7. $5\frac{1}{8} > -5\frac{1}{8}$

8. $0.6 > -0.6$

9. $-\frac{15}{4} < \frac{15}{4}$

10. A number line with the value $\frac{3}{8}$ plotted is shown.

Kyree said that the opposite of $\frac{3}{8}$ is $\frac{8}{3}$ and so $\frac{3}{8}$ is less than its opposite. Explain whether you agree with Kyree.

I disagree. $\frac{8}{3}$ is the reciprocal of $\frac{3}{8}$ not the opposite. The opposite is $-\frac{3}{8}$ of $\frac{3}{8}$.
