

Name: _____

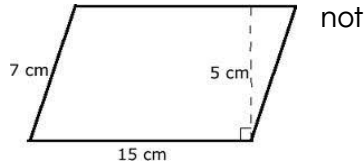

Period: _____ Date: _____

7th Grade

Lesson 4.1 Skills Practice Worksheet

Directions: Use the figures with the dimensions shown below to answer the questions.

1. Which dimension is needed to find the area?

2. Fill in the blanks to find the area of the parallelogram

$$\text{Area of a parallelogram} = b \cdot h$$

$$\text{Area} = \underline{\hspace{2cm}} \cdot \underline{\hspace{2cm}}$$

$$\text{Area} = \underline{\hspace{2cm}} \text{ in.}^2$$

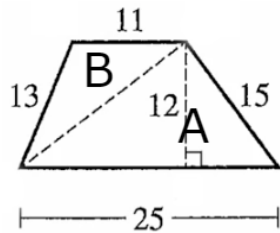

A trapezoid can be decomposed into two triangles with the same height. Use the diagram below for questions 3-6

3. The area of triangle A is _____.

4. The area of triangle B is _____.

5. The area of the trapezoid is _____ units^2

6. Use the formula to find the area of a trapezoid to verify your solution is correct.

$$\text{Area} = \frac{1}{2}h(b_1 + b_2).$$

$$\text{Area} = \frac{1}{2} \underline{\hspace{2cm}} (\underline{\hspace{2cm}} + \underline{\hspace{2cm}})$$

$$\text{Area} = \underline{\hspace{2cm}} \text{ units}^2$$
