

Name: _____

Period: _____ Date: _____

7th Grade

Lesson 5.1 Skills Practice Worksheet

Directions: For each scenario, determine the population, sample and whether the sample is a fair representation of the population.

Scenario 1: A business owner wants to open a new trampoline park in Oviedo, Florida and wants to know if the customers in the area would be interested in getting a membership. He asks 30 random people at an arcade if they would be interested in coming to the grand opening and getting a membership.

1. What is the population?
2. What is the sample?
3. Is this sample representative of the population?

Scenario 2: Ashley wants to sell something at her community garage sale and wants to know whether people are more likely to buy hot dogs or bagels. She decides to ask everyone she sees in the grocery store which they prefer before deciding what to offer.

4. What is the population?
5. What is the sample?
6. Is this sample representative of the population?
7. Select the sample options that provide the best sample representative of a population.

- ☐ Ask everyone in the family if they like cold weather or hot weather.
- ☐ Ask every other friend at school what their favorite holiday is.
- ☐ Ask every 10th student at their school what their favorite subject is.
- ☐ Ask all the moms at an early soccer game whether they drink coffee or not.
