

Name: _____

Period: _____ Date: _____

7th Grade
Lesson 5.4 Skills Practice Worksheet

Directions: Use the data presented to make predictions about different populations.

South Seminole Middle school has 1,458 students enrolled. Rex wants to know which school lunch options they prefer. He sampled 50 students randomly and his findings are below.

Pizza	Chicken Nuggets	Tacos	Salad
16	9	19	6

1. How many students do you predict prefer pizza?
2. How many students do you predict prefer chicken nuggets?
3. How many students do you predict prefer tacos?
4. How many students do you predict prefer salad?

Taliyah sampled 5% of her school’s 980 students who write their assignments in a planner each day. The results are below.

Yes	No
21	28

5. How many students were in Taliyah’s sample?
6. How many students can you predict write their homework each night in a planner?
7. How many students can you predict do not write their assignments in a planner?
