

Grade 6 Accelerated  
Unit 2  
Lesson 1 Homework

Name Answer Key  
Date \_\_\_\_\_  
Period \_\_\_\_\_

Rewrite each decimal as an equivalent fraction. Simplify if possible.

1. 2.71

$$2\frac{71}{100} \text{ or } \frac{271}{100}$$

2. 0.009

$$\frac{9}{1000}$$

Convert each fraction to an equivalent decimal.

3.  $\frac{4}{25} = 0.16$

$$\begin{array}{r} \phantom{25} \overline{) 4.16} \\ \underline{25} \phantom{0} \\ 15 \phantom{0} \\ \underline{15} \phantom{0} \\ 0 \end{array}$$

4.  $1\frac{3}{8} = 1.375$

$$\begin{array}{r} \phantom{8} \overline{) 13.75} \\ \underline{8} \phantom{00} \\ 5 \phantom{00} \\ \underline{40} \phantom{0} \\ 6 \phantom{0} \\ \underline{56} \\ 4 \phantom{0} \\ \underline{40} \\ 0 \end{array}$$

Rewrite each decimal as a percentage.

5. 3.02

$$302\%$$

6. 0.095

$$9.5\%$$

Convert each percentage to an equivalent decimal.

7.  $6\%$   
 $0.06$

8.  $552\%$   
 $5.52$

9. Determine which of the numbers is not equivalent to 0.35. Show your work.

$$\frac{7}{20}$$

$$35\% = 0.35$$

$$3.5\% = 0.035$$

$$\frac{35}{100} = \frac{7}{20}$$

$$\begin{array}{r} 20 \overline{) 7.00} \\ \underline{-60} \phantom{0} \\ 100 \\ \underline{-100} \\ 0 \end{array}$$

This number is  
not equivalent to  
0.35.

10. Darius wanted to convert  $\frac{5}{8}$  to a decimal. His work is shown below. Is Darius correct? If he is correct, explain the steps that he took. If he is incorrect, explain his error(s).

$$\begin{array}{r} 1.6 \\ 5 \overline{) 8.} \\ \underline{5} \phantom{0} \\ 30 \\ \underline{30} \\ 0 \end{array}$$

$$\frac{5}{8} = 1.6$$

Darius is not correct. He set the problem up incorrectly. It should be:

$$\begin{array}{r} .625 \\ 8 \overline{) 5.000} \\ \underline{-48} \phantom{00} \\ 200 \\ \underline{-160} \phantom{0} \\ 400 \\ \underline{-400} \\ 0 \end{array}$$

$$\frac{5}{8} = 0.625$$
