

Grade 6 Accelerated
Unit 2
Lesson 3 Homework

Name _____
Date _____
Period _____

A fraction is shown.

$$\frac{13}{40}$$

1. Rewrite the fraction as an equivalent decimal.
2. Based on your answer from question 1, what is an equivalent percentage to $\frac{13}{40}$?

Complete the table by rewriting each fraction as a decimal and as a percentage.

	Fraction	Decimal	Percentage
3.	$\frac{9}{16}$		
4.	$\frac{15}{8}$		

Complete the table by rewriting each value in its equivalent forms. Simplify any fractions if possible.

	Fraction	Decimal	Percentage
5.		0.24	
6.			6%
7.	$3\frac{4}{25}$		
8.		2.88	
9.			1.5%

10. Determine which of the numerical values is not equivalent to the others. Explain your reasoning.

1.2

$\frac{6}{5}$

120%

$\frac{5}{4}$

$\frac{120}{100}$
