

Grade 6 Accelerated
Unit 2
Lesson 5 Homework

Name _____
Date _____
Period _____

1. A list of financial terms is shown.

taxes income deposit costs withdrawal return on investment expenses

Complete the table by placing each financial term in the column of the mathematical operation it is most usually associated with.

Addition (+)	Subtraction (-)

Georgia works in the library in her college. She makes \$23.75 per hour. Last week, Georgia worked 16.5 hours and paid \$82.43 in taxes.

2. What was Georgia's gross income last week? Show your work.
3. What was Georgia's net income last week? Show your work.
4. If Georgia works 1.2 times as many hours next week, how many hours will she work next week?

5. Celeste has \$2,397.85 in her checking account. She has a check to deposit for \$384.30. What will her account balance be after she deposits the check?

6. Tushar had \$4,198.77 in his savings account. If he withdraws \$582.95, what will his new account balance be?

7. Last year, Allison invested \$2,500 in a local business. At the end of the year, the return on her investment was \$71.20. If she combines the return with her initial investment, how much does Allison now have invested in the business?

Flower Power shop in Davenport, FL sells 6 sunflowers for \$13.50.

8. What would be the cost for 1 sunflower?

9. Suppose one day, Flower Power sells 45 sunflowers. What would their gross income be from selling sunflowers?

10. Flower Power pays \$37.50 to buy the sunflowers from a nearby farm. What is their net income from selling sunflowers?
