Lesson 7 Practice

Name _____
Date _____
Period _____

1. Sara bought 8.6 yards of fabric that cost \$12.40 per yard. If she had a coupon for \$10 off, how much did Sara spend on the fabric altogether?

Francis is buying wallpaper for 2 walls in his bedroom. The first wall measures 9.2 feet by 7.5 feet, and the second wall measures 9.2 feet by 8.8 feet. Both walls are rectangular. Wallpaper costs \$7.40 per square foot, and a bucket of primer costs \$28.99.

2. How many square feet of wallpaper does Francis need altogether?
3. How much will Francis spend on wallpaper and one bucket of primer?

Angelica's goal is to run $3\frac{1}{4}$ miles on Monday, $2\frac{5}{12}$ miles on Tuesday, and $3\frac{5}{6}$ miles on Wednesday. She runs on a track where each lap is $\frac{1}{3}$ of a mile.

4. How many total laps will Angelica have to run to meet her goal for Monday thru Wednesday?
5. Suppose last week Angelica ran a total of 40 laps. How many more miles will she have to run after Wednesday to run the same distance this week as last week?

Gustav is saving his money to buy a new computer. He currently has \$318.73 in his savings account. The table shows the occasional jobs Gustav works to earn money.

Job	Rate
Lawn-mowing	\$12.50 per lawn
Car-washing	\$13.25 per car
Babysitting	\$16 per hour
DJing	\$21 per hour

6. On Saturday, Gustav mowed 3 lawns and washed 7 cars. How much money did he make altogether on Saturday?
7. On Sunday, Gustav babysat his cousin for 3.5 hours. Then, he DJed a party that was 2.5 hours long. How much money did Gustav make on Sunday?
8. If he deposits all his income from the weekend into his savings account, how much will Gustav now have in his savings account?
9. Suppose the computer Gustav wants to buy costs \$999. How much more does he need to save?
10. What is a combination of jobs that Gustav could work such that he would have enough money saved to buy his computer?
