

A number line with points D , S , R , M , J , F , L , and H is shown.

1. Complete the table by identifying which points belong in each category. Some points may be used more than once and some may not be used at all.

Natural Numbers	Whole Numbers	Integers	Rational Numbers

2. Complete the table by identifying which points belong in each category. Some points may be used more than once and some may not be used at all.

Positive Numbers	Negative Numbers

3. Plot the integers -2 , -3 , 5 , and -5 on the number line.

4. Plot the numbers $\frac{4}{5}$, -3.75 , 4.4 , and $-1\frac{1}{2}$ on the number line.

5. Plot the numbers $-\frac{3}{2}$, $3\frac{1}{3}$, and -4.75 .

6. Plot the numbers $\frac{5}{3}$, $-\frac{3}{8}$, and -0.8 .

A number line with points T and W is shown.

7. Explain how to estimate the value of T .

8. Explain how to estimate the value of W .

Mariah and Jackson both estimated the value of Y on the number line shown.

9. Mariah says the value of Y is about -4.8 . Explain whether you agree with Mariah.

10. Jackson says the value of Y is about $-3\frac{1}{2}$. Explain whether you agree with Jackson.
