

Grade 6 Accelerated
Unit 3
Lesson 8 Practice

Name Answer Key
Date _____
Period _____

Use the symbols $<$, $>$, and $=$ to compare each pair of values.

1. $|-83|$ $>$ -77 $83 > -77$

2. 31.8 $=$ $|-31.8|$ $31.8 = 31.8$

Find the value of each expression.

3. $|-44| - |-18|$
 $44 - 18 = 26$
 34^{14}
 $\frac{-18}{26}$

4. $|-5| \times |-9|$
 $5 \times 9 = 45$

5. $|-23| + |-7| + 2$
 $23 + 7 + 2$
 $30 + 2$
 $= 32$

Sia made two transactions on her bank account last week. She made a withdrawal of \$184.60 and a deposit of \$98.55.

6. Write a value that could be used to describe each of Sia's transactions.

Transaction	Value
Withdrawal	-184.60
Deposit	98.55

7. Use an inequality symbol, $>$ or $<$, to compare the absolute values of Sia's transactions.

$$-|184.60| \text{ } > \text{ } |98.55|$$

8. What does this inequality statement indicate about the total change in Sia's bank account last week?

It indicates that she withdrew more than she deposited.

On April 6th, 2020, two baby giraffes were born at the Miami zoo to two different female giraffes, Mia and Zuri. Mia's calf was 49 pounds above the average newborn giraffe weight, while Zuri's calf was 13 pounds below the average weight.

9. Write a value that could be used to describe each calf's weight in relation to the average.

Calf	Value
Mia's calf	49
Zuri's calf	-13

10. Use an inequality symbol, $>$ or $<$, to compare the absolute values.

$$|49| \text{ } > \text{ } |-13|$$
