

Grade 6 Accelerated
Unit 4
Lesson 3 Practice

Name Answer Key
Date _____
Period _____

The temperature in Ann Arbor, MI was recorded at various times during the week. The times relative to midnight, H , and temperatures in degrees Celsius ($^{\circ}\text{C}$) are shown in the table.

Day Observed	Time (hours before or after midnight, H)	Temperature ($^{\circ}\text{C}$)
Monday	-2	$\frac{7}{8}$
Tuesday	-6	$-1\frac{4}{7}$
Thursday	0	$-\frac{6}{5}$
Saturday	6	$-4\frac{1}{4}$
Sunday	8	$\frac{17}{8}$

Plot the points that represent the data.

- Monday (M)
 $(-2, 0.875)$
- Tuesday (T)
 $(-6, -0.571)$
- Thursday (R)
 $(0, -1.2)$
- Saturday (S)
 $(6, -4.25)$
- Sunday (N)
 $(8, 2.0125)$

The average number of interceptions in the NFL during the 2021 season was 0.81. The average number of interceptions for four NFL teams is shown in the table, with their average points per game, p , and their difference from average, d .

Player	Average Points Per Game (p)	Difference from Average (d)
Tampa Bay	0.7	-0.11
Miami	0.8	-0.01
Green Bay	0.4	-0.41
Jacksonville	1.0	0.19

Graph the points from the table on the coordinate grid.

6. Tampa Bay (T)
 $(0.7, -0.11)$

7. Miami (M)
 $(0.8, -0.01)$
8. Green Bay (G)
 $(0.4, -0.41)$

9. Jacksonville (J)
 $(1.0, 0.19)$
10. Was the scaling of the coordinate grid appropriate for this data set? Why or why not?
No, the data points are too close together. The scaling of the graph does not give a good display of the data.
