

Grade 6 Accelerated
Unit 4
Lesson 4 Homework

Name Answer Key
Date _____
Period _____

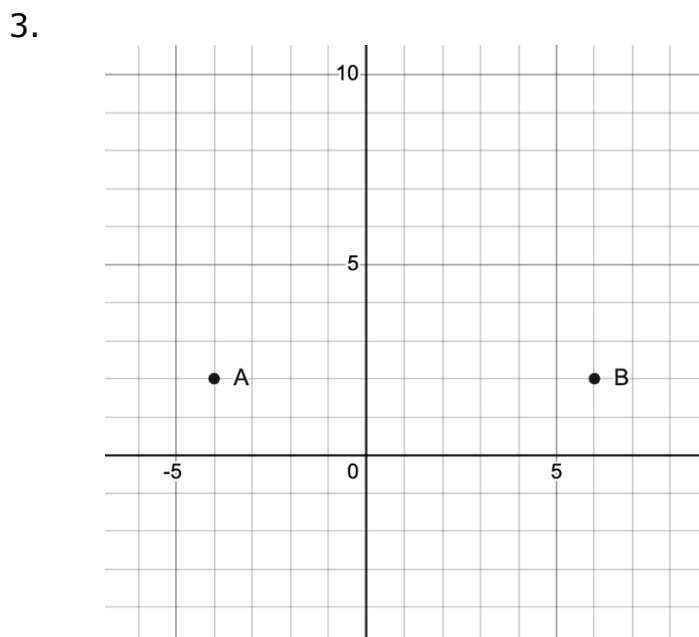

Determine the distance between each set of ordered pairs.

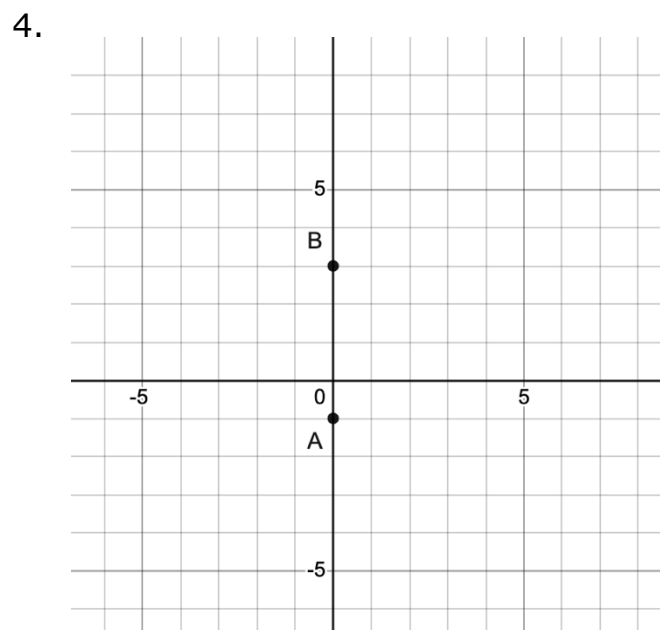

$$|-4.5| + |0.5| = \boxed{5 \text{ units}}$$

$$|9| - |5| = \boxed{4 \text{ units}}$$

$$|-4| + |6| = \boxed{10 \text{ units}}$$

$$|3| + |-1| = \boxed{4 \text{ units}}$$

5. $(\underline{3\frac{1}{2}}, 10)$ and $(\underline{-4\frac{1}{2}}, 10)$

$$\left|3\frac{1}{2}\right| + \left|-4\frac{1}{2}\right| = \boxed{8 \text{ units}}$$

6. $(-3, \underline{2})$ and $(-3, \underline{0})$

$$|2| + |0| = \boxed{2 \text{ units}}$$

7. $(\underline{5.5}, \frac{21}{2})$ and $(\underline{3}, 10.5)$

$$\frac{21}{2} = 10.5$$

$$|5.5| - |3| = \boxed{2.5 \text{ units}}$$

8. $(\underline{-3\frac{7}{8}}, 2)$ and $(\underline{\frac{5}{8}}, 2)$

$$\left|-3\frac{7}{8}\right| + \left|\frac{5}{8}\right| = 4\frac{4}{8} = \boxed{4\frac{1}{2} \text{ units}}$$

9. $(\underline{6}, 16.5)$ and $(\underline{-2}, 16.5)$

$$|6| + |-2| = \boxed{8 \text{ units}}$$

10. $(\underline{1.5}, 3\frac{1}{2})$ and $(\underline{-4.5}, 3\frac{1}{2})$

$$|1.5| + |-4.5| = \boxed{6 \text{ units}}$$
