

6Ath Grade: Unit 5, Lesson 4

1. If a car travels 12 miles in 6 minutes, what is the unit rate in miles per minute?

2. Complete the table by determining the amount of balloons needed to lift a 15 pound lb. desk.

Object	Balloons	Weight (lbs)	Unit Rate (balloons per pound)
Student	1000	25	$\frac{1000}{25} = 40$
Desk	_____	15	$\frac{\quad}{15} = 40$

3. Suppose the unit rate for the number of balloons that can lift objects off of the ground to their weight is 8 balloons to 1 pound (lb.). How many pounds can be lifted by 64 balloons?
