

Grade 6 Accelerated
Unit 5
Lesson 9 Homework

Name _____
Date _____
Period _____

1. At a clothing store, a pair of jeans costs \$60. Using a coupon, Lyla buys the jeans for \$12 less than the original price. Complete the table.

Dollar Amount	Percentage

2. The coupon gives Lyla _____ % off of the original amount.
3. How much did Lyla pay for the jeans (before tax)?
4. In a bag of candy, 20% are blue. There are 30 candies in the bag. How many blue candies are there?
5. For one math test, Salvatore had to answer 24 questions. Of those 24 questions, he answered 22 correctly. What percent did Salvatore get on his math test? Round to the nearest percent.

6. Jeffrey has 40% as much money as Louis. Louis has \$80. Select all true statements.

☐ Jeffrey has \$32.

☐ Jeffrey has \$48.

☐ Jeffrey has \$24.

☐ Louis has $\frac{2}{5}$ as much as Jeffrey.

☐ Jeffrey has $\frac{2}{5}$ as much as Louis.

☐ Louis has $\frac{5}{2}$ as much as Jeffrey.

☐ Jeffrey has $\frac{5}{2}$ as much as Louis.

7. A small pool holds 20,400 gallons of water. Devyn filled it up to 85% capacity but then had to stop to do her other chores. Complete the table to determine how many gallons of water Devyn put in the pool.

Number of Gallons	Percentage of Capacity

8. Devyn will need to fill the pool with _____ more gallons of water to be at 100% capacity.

9. Many movie theaters offer a discount for students or children. At one local theater, a regular ticket for an evening show is \$17.99. A child's ticket for the same show is \$14.99. What percent of the full ticket price is a child's ticket? Round to the nearest percent.

10. Movie theaters often charge less for matinee showings. At the same theater, a matinee ticket for a child is 77% of the price of an adult's matinee ticket. Adult matinee tickets cost \$9.09. How much does a child's matinee ticket cost? Round to the nearest penny.
