

6Ath Grade: Unit 6, Lesson 5

1. Determine the sign of the sum for each of the expressions in the table.

Expression	Sign of the Sum
$-856 + 900$	
$76 + (-79)$	
$-54 + (-23)$	

2. In the expression $-5 + (-9)$, describe the process of finding the sum using integer chips.

3. What is the additive inverse of -26 ?

4. What is the sum of $-26 + (-11)$?

5. Will the expression $-438 + 291$ result in a positive or negative sum?

6. Find the sum of $-441 + (-329)$.
