

Unit 7: Worked Examples

Find the area.

1.

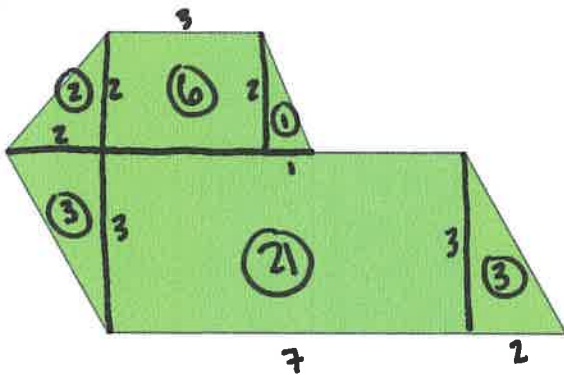

16.3 ft

$$146.7 + 5.4 + 5.4$$

$$157.5 \text{ ft}^2$$

2.

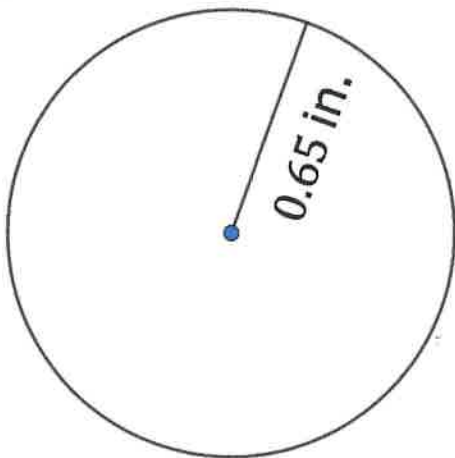

$$2 + 6 + 1 + 3 + 21 + 3$$

$$(36)$$

Find the circumference and area. Use 3.14 for pi.

3.

$$C = \pi d$$

$$C = 1.3\pi$$

$$C = 4.082$$

$$A = \pi r^2$$

$$A = (3.14)(0.65)^2$$

$$A = \sim 1.326 \text{ in}^2$$
