Period \_\_\_\_\_

Four triangles are shown on the grids. For each triangle, a base and its corresponding height are labeled. The side length of each square is 1 inch (in.). Find the area of each triangle. Show your work and include units.

|    |                                                                                     |              |
|----|-------------------------------------------------------------------------------------|--------------|
| 1. |    | Area = _____ |
| 2. |   | Area = _____ |
| 3. |  | Area = _____ |
| 4. |  | Area = _____ |

For each triangle below, circle the base measurement and put a square around the height measurement. Then, use the base and height to find the area of each triangle. Show your work and include units.

|    |                                                                                     |              |
|----|-------------------------------------------------------------------------------------|--------------|
| 5. |    | Area = _____ |
| 6. |    | Area = _____ |
| 7. |   | Area = _____ |
| 8. |  | Area = _____ |

Jack found the area of the triangle shown. His work is also shown.

$$\text{Area} = 21 \times 13 \times 0.5$$

$$\text{Area} = 136.5 \text{ ft}^2$$

9. Explain why Jack's answer is incorrect.

10. Find the correct area of the triangle.
