

6Ath Grade: Unit 7, Lesson 5

1. The formula $A = \frac{bh}{2}$ is used to find the area of which shape?

2. A trapezoid is shown on a grid, with each gridline representing one unit. What is the length of base k on the trapezoid?

3. A rhombus with measurements in centimeters (cm) is shown. Which expression could be used to calculate the area?
