

Grade 6 Accelerated
Unit 8
Lesson 6 Homework

Name _____
Date _____
Period _____

A rectangular pyramid is shown with measurements in inches (in.).

1. Draw a net or the individual faces of the figure. Label the measurements.

2. Find the surface area of the figure.

A rectangular prism is shown with measurements in centimeters (cm).

3. Draw a net or the individual faces of the figure. Label the measurements.

4. Find the surface area of the figure.

5. Find the volume of the figure.

Sanjay is designing a suitcase. He drew a model of his suitcase.

6. If the case has a volume of 7,098 cubic inches (in^3), what is the length of the case?

7. How much material would Sanjay need to make a case with these dimensions, not taking into consideration any overlap of the faces?

8. If the inside of the case has a length of 18 in., a width of 11.5 in., and a height of 24 in., how much smaller is the volume of the inside of the case than the volume of the entire case?

Jocelyn makes and sells bookends that are in the shape of rectangular pyramids.

9. What is the surface area of one bookend?

10. If Jocelyn paints only the triangular faces, what is the surface area of the area she wants to paint?
