

Grade 6 Accelerated
Unit 12
Lesson 5 Practice

Name Answer Key
Date _____
Period _____

For each problem, round your answer to the nearest hundredth, if necessary.

1. The original price of a wooden table is \$53. With a discount of the 30%, what is the sale price?

$$53(0.70) = \$37.10$$

2. Michelle buys a dress online for \$62. The shipping company charges 7% of the item price to make the delivery. How much does the dress and shipping cost for Michelle?

$$62(1.07) = \$66.34$$

3. A store purchased a new cash register for \$523.64, without tax. After a 4% sales tax, what is the total price the store must pay?

$$523.64(1.04) \approx \$544.59$$

4. The sales tax rate is 3%. If Gus buys a new pair of shoes priced at \$123.84, what will be the total cost including tax?

$$123.84(1.03) \approx \$127.56$$

5. A furniture company sold a sofa for \$657. Including sales tax, the total of sofa is \$764.78. What is the percent of sales tax?

$$\begin{aligned} 764.78 - 657 &= 107.78 \text{ sales tax} \\ \frac{107.78}{657} \times 100 &= 16.4\% \end{aligned}$$

6. A TV cost the company \$378 and is selling it for \$483. What is the markup percentage?

$$483 - 378 = 105 \text{ mark up}$$
$$\frac{105}{378} \times 100 = \boxed{27.78\%}$$

7. Roger bought an item that cost \$64.30. After sales tax, the total is \$68.99. What is the sales tax percentage?

$$68.99 - 64.30 = 4.69 \text{ sales tax}$$
$$\frac{4.69}{64.30} \times 100 = \boxed{7.29\%}$$

8. A bill for a restaurant came out to be \$142.60. The costumer tips 13% of the bill. How much is the tip?

$$142.60(0.13) \approx \boxed{\$18.54}$$

9. Rosa and her husband are celebrating their anniversary and went for a nice dinner. After the meal, the total bill was \$175.20. A 15% tip was included in the total bill. How much does dinner cost before the tip?

$$\begin{aligned} \% \quad & \frac{1.15}{\$ \quad \frac{175.20}{x}} = \frac{1}{x} \\ & 1.15x = 175.20 \\ & x = \boxed{\$152.35} \end{aligned}$$

10. Some friends went to a grocery store and bought snacks to watch the football game. The total was \$76.82. They were also charged 4% in sales tax. How much was the total cost of the bill, after tax?

$$76.82(1.04) \approx \boxed{\$79.89}$$
