

6Ath Grade: Unit 13, Lesson 8

1. Simplify the following algebraic expression into an equivalent expression.

$$(2x + 1) + (x + 3)$$

2. Consider the algebraic expression given below. What is the equivalent expression after regrouping?

$$(9x - 12) + (x - 3)$$

3. Given the following expression, what is the simplified expression after combining like terms?

$$(-2x + 4) + (-8x - 3)$$
