

Grade 6 Accelerated
Unit 13
Lesson 11 Homework

Name _____
Date _____
Period _____

From the specified set of integers, determine which, if any, make the equation true.

$\{-4, -1, 1, 8\}$

1. $12 + 5w = 6w + 4$

2. $3 - x = 2x + 6$

3. $3y - 5 = 8y + 15$

4. $2u + 6 = 9u - 1$

Determine if the inequality $18 \geq 2m - 6$ is true for each value.

5. 8

6. 12

7. 15

Determine if the inequality $-y + 3 + 8y \geq -3y - 7$ is true for each value.

8. -5

9. 0

10. 5
