

Grade 6 Accelerated
Unit 14
Lesson 2 Practice

Name Answer Key
Date _____
Period _____

Solve.

1. $5 \cdot \frac{1}{5} \cdot b = \frac{7}{10} \cdot 5$

$$b = \frac{35}{10} \text{ or } b = 3\frac{1}{2}$$

2. $4 = g - \frac{1}{4}$
 $+ \frac{1}{4} \quad + \frac{1}{4}$

$$g = 4\frac{1}{4}$$

3. $p \div \frac{14}{15} = 2$

$$\frac{p}{\frac{14}{15}} = 2$$

$$p = 2 \cdot \left(\frac{14}{15}\right)$$

$$p = \frac{28}{15} = 1\frac{13}{15}$$

4. $\frac{1}{2} = 4\frac{1}{2} + t$

$$-4\frac{1}{2} \quad -4\frac{1}{2}$$

$$-4 = t$$

5. $c + 1\frac{1}{4} = 2\frac{1}{6}$

$$-1\frac{1}{4} \quad -1\frac{1}{4}$$

$$c = \frac{11}{12}$$

6. $4 \cdot \frac{1}{4}r = \frac{5}{36} \cdot 4$

$$r = \frac{20}{36} \text{ or } \frac{5}{9}$$

7. In preparation for a party, Suzanne filled four equal sized candy jars with $3\frac{2}{3}$ cups of various candies. How many cups of candy did Suzanne use?

$$c \div 4 = 3\frac{2}{3}$$

$$c = 4 \cdot 3\frac{2}{3}$$

$$c = 4 \cdot \frac{11}{3} = \frac{44}{3}$$

$$c = 14\frac{2}{3}$$

Suzanne used $14\frac{2}{3}$ cups of candy.

8. After lighting a candle, $\frac{3}{8}$ inches of it were burned before it was put out, leaving $2\frac{1}{6}$ inches of the candle remaining. How long was the candle before it was lit?

$$\begin{array}{r} c - \frac{3}{8} = 2\frac{1}{6} \\ + \frac{3}{8} \quad + \frac{3}{8} \end{array}$$

The candle was $2\frac{13}{24}$ inches before it was lit.

$$c = 2\frac{13}{24}$$

9. A 20 ounce soda bottle has $12\frac{2}{5}$ ounces remaining. How much soda was removed from the bottle?

$$\begin{array}{r} 20 - s = 12\frac{2}{5} \\ + s \quad + s \\ 20 = 12\frac{2}{5} + s \\ -12\frac{2}{5} \quad -12\frac{2}{5} \end{array}$$

$7\frac{3}{5}$ ounces of soda were removed from the bottle.

$$7\frac{3}{5} = s$$

10. A wedding dress designer orders $5\frac{1}{8}$ yards of lace to enhance a client's veil. After making the enhancements, they have $2\frac{3}{4}$ yards of lace left. How much lace was used for the veil?

$2\frac{3}{8}$ yards of lace were used for the veil.

$$\begin{array}{r} 5\frac{1}{8} - v = 2\frac{3}{4} \\ + v \quad + v \\ 5\frac{1}{8} = v + 2\frac{3}{4} \\ -2\frac{3}{4} \quad -2\frac{3}{4} \end{array}$$

$$\frac{19}{8} = v \quad \text{or } v = 2\frac{3}{8}$$
