

Grade 6 Accelerated
Unit 14
Lesson 2 Homework

Name Answer Key
Date _____
Period _____

Solve.

$$\begin{aligned} 1. \quad x - 14.5 &= 41.7 \\ &+14.5 \quad +14.5 \\ x &= 56.2 \end{aligned}$$

$$\begin{aligned} 2. \quad 6 \cdot \frac{k}{6} &= 12.25 \quad \cdot 6 \\ k &= 73.5 \end{aligned}$$

$$\begin{aligned} 3. \quad 0.75 - p &= 0.19 \\ -1p &= 0.75 - 0.19 \\ -1p &= 0.56 \\ p &= 0.56 \end{aligned}$$

$$\begin{aligned} 4. \quad \underline{18} &= \underline{0.5t} \\ 0.5 \quad 0.5 \\ t &= 36 \end{aligned}$$

$$\begin{aligned} 5. \quad 6.5 + f &= 17.11 \\ -6.5 \quad -6.5 \\ f &= 10.61 \end{aligned}$$

$$\begin{aligned} 6. \quad \frac{3}{2} \cdot \frac{2}{3}r &= 22.8 \quad \cdot \frac{3}{2} \\ r &= 34.2 \end{aligned}$$

7. Mike made jelly and filled three equal sized jars with $3\frac{2}{3}$ cups of jelly. How much jelly did Mike make?

$$x \div 3\frac{2}{3} = 3$$

Mike made 11 cups of jelly.

$$x = 3 \cdot 3\frac{2}{3}$$

$$x = 3 \cdot \frac{11}{3} = 11$$

8. Davis cut $\frac{1}{6}$ feet off of a piece of fabric, leaving $4\frac{1}{2}$ feet of fabric left. How long was the fabric before Davis cut it?

$$x - \frac{1}{6} = 4\frac{1}{2}$$

The fabric was originally $4\frac{2}{3}$ ft. long.

$$x = 4\frac{1}{2} + \frac{1}{6} = 4\frac{2}{3}$$

9. An environmental science teacher has a 10-gallon fish tank. Currently, the tank has $4\frac{9}{11}$ gallons of water inside. How much more water is needed to fill the tank?

$$10 - x = 4\frac{9}{11}$$

$5\frac{2}{11}$ gallons are needed to fill the tank.

$$x = 9\frac{11}{11} - 4\frac{9}{11}$$

$$x = 5\frac{2}{11}$$

10. The 6th grade class at a school is volunteering to decorate a hallway for homecoming. The students have decorated $\frac{5}{16}$ of a mile in decorations which is $\frac{3}{4}$ of the hallway. What is the length of the hallway being decorated?

$$\frac{4}{3} \cdot \frac{3}{4}x = \frac{5}{16} \cdot \frac{4}{3}$$

The hallway is $\frac{5}{12}$ of a mile long.

$$x = \frac{5}{12}$$
