6Ath Grade: Unit 2, Lesson 5

1. The recommended amount of sleep for an adult is 8 hours per night. Write an expression that could be used to determine the recommended amount of sleep for an adult per week.

2. An airline charges $55 for each additional checked bag beyond the first one. If a customer spent $330, how many bags did the check?

3. There were 900 boxes to load onto shipping trucks at the beginning of a shift. At the end of the shift, there were 242 boxes left to be loaded. How many boxes were loaded onto the trucks during this shift?
