

Algebra 1: Unit 1, Lesson 7

1. Evaluate the following.

$$(125)^{\frac{1}{3}} \cdot 5^{-6}$$

2. The expression $(100)^{\frac{6}{7}}$ is equivalent to $\sqrt[6]{100^7}$. There is an error in this statement. What is the equivalent expression to $(100)^{\frac{6}{7}}$?

3. Complete the table by rewriting equivalent radical expressions.

$\sqrt{b}$	$\sqrt{(a)^2}$	$\sqrt[3]{c}$	$\sqrt[3]{(d)^3}$
$\sqrt{81}$	_____	$\sqrt[3]{216}$	_____
