

Algebra 1: Unit 1, Lesson 8

1. Rewrite $\sqrt{432}$ in simplest radical form.

2. A list of factor pairs are shown below. Which factor pair(s) include a perfect cube?

$$3 \times 44, \quad 4 \times 27, \quad 5 \times 20, \quad 125 \times 6, \quad 12 \times 7, \quad 64 \times 8$$

3. A list of factor pairs are shown below. Which factor pair(s) include a perfect square?

$$108 \times 2, \quad 6 \times 36, \quad 12 \times 18, \quad 54 \times 4, \quad 3 \times 72, \quad 8 \times 27, \quad 24 \times 9$$
