

Algebra 1: Unit 1, Lesson 10

1. Simplify the expression $\frac{\sqrt{243}}{\sqrt{300}}$.

2. A student is finding an equivalent expression for $\sqrt[3]{1875}$. Their work is shown.

Step 1	$(1875)^{\frac{1}{3}}$
Step 2	$(3 \cdot 125 \cdot 5)^{\frac{1}{3}}$
Step 3	$(3)^{\frac{1}{3}} \cdot (125)^{\frac{1}{3}} \cdot (5)^{\frac{1}{3}}$
Step 4	$3 \cdot 5 \cdot 5$
Step 5	75

In which step did the student make their mistake?

3. Simplify the expression $\sqrt{36} \cdot \sqrt{25}$?
